

DR. JONNESCO MAKES GOOD

PAINLESS OPERATIONS ON FOUR CONSCIOUS PATIENTS.

Paralyzed Child and a Woman With Fractured Hip Two of the Subjects Anesthetized by Stovaine and Strychnine—Medical Witnesses Are Impressed.

A boy less than 5 years old lay on the operating table at the Hospital of the New York Society for the Relief of the Ruptured and Crippled yesterday morning. Around the table were fifty physicians and surgeons, among them the best known of their profession.

Jonnesco, the Rumanian surgeon, stepped up to the table, smiled reassuringly at the boy, patted him on the shoulder and gently turned him on his back. The boy smiled bravely back at the surgeon. The New York medical men leaned forward a trifle, watching intently.

The slim needle of a hypodermic syringe glittered for a moment in the Rumanian's hand. He pressed the point of it into the boy's back, low down on the spinal column, injecting stovaine. The boy flinched and the medical men looked at each other. Jonnesco waited less than two minutes, then bowed to Dr. Virgil P. Gibney, returning to give Dr. Gibney elbow room.

Dr. Gibney, a well known orthopedic specialist, took hold of the boy's right foot and began to use the knife. It was a case of infantile paralysis. The boy's right leg was crippled and useless. It was necessary to make incisions around the Achilles tendon and stretch it. In such cases ether is used customarily, for the operation is so delicate and painful that complete anesthesia must be obtained to prevent movement of the part of the patient and to do away with suffering.

While Dr. Gibney's hands moved swiftly and surely the medical men talked among themselves and watched the boy, who lay perfectly conscious, his face covered by a towel. Prof. Jonnesco spoke rapidly in French, explaining this or that phase of the operation as it was connected with the uses of his anesthetic. Occasionally Dr. Gibney or Mr. Soutzo, Prof. Jonnesco's associate, spoke to the boy. Once he was asked: "How do you feel?"

The surgeon waited intently for the boy's answer. It was so quiet that the cries of the newboys in Forty-second street came uproariously through the windows.

"Aw right," said the boy, his treble muffled a bit by the towel over his eyes and face.

"Do you feel any pain?"

"It don't hurt at all," said the boy. "I feel fine."

Jonnesco smiled quietly, triumphantly.

The medical men glanced around at each other again. Some of them, as was to be seen easily, were enthusiastic. Others shook their heads as if still in doubt.

After about twenty-five minutes the operation was completed and the wound bandaged. The little boy was carried back to his cot. They took the towel off his face. The surgeons looked to see if there were traces of pain or signs of nausea. There wasn't the slightest indication of suffering or sickness. The child was smiling at Dr. Bennett, the house surgeon. He seemed to be at his ease and in the possession of all his senses.

That was the first of four cases at the Hospital for the Relief of the Ruptured and Crippled in which Prof. Thomas Jonnesco, who discovered how a combination of stovaine and strychnine may be used as a local anesthetic safely and painlessly while the patient remains conscious, demonstrated the uses of his application.

His demonstration was regarded as a brilliant success by most of the surgeons present. They hesitated to express opinions for publication at this time, but the majority seemed to think that Jonnesco had made good.

The demonstration began shortly after 9 o'clock yesterday morning. The board of managers of the hospital, which is extremely conservative and very well known, had invited the Rumanian scientist to make the first exposition of what stovaine could accomplish before a company of fifty physicians and surgeons.

Dr. William Mayo of Rochester, Minn., whom Prof. Jonnesco considers the most eminent surgeon in America and one of the world's leading men of the profession, came to New York from his home in Rochester. Dr. Virgil P. Gibney, surgeon-in-chief of the hospital, and Dr. Homer Gibney, both specialists in orthopedic cases, were there to operate. So was Dr. William R. Coley, the specialist in hernia. Among others who looked on were Dr. John B. Walker, Dr. Nathaniel Bowditch Potter, Dr. William Downe, Dr. A. H. Ciley, Dr. Wm. R. Townsend, Dr. Royal Whitman, Dr. William Seaman Bainbridge and Dr. Robert Morris. Oliver H. Bartine, the superintendent of the hospital, was present, and Dr. George E. Bennett, the house surgeon.

There were few preliminaries after the company of surgeons and doctors had assembled. Some of them greeted Prof. Jonnesco and talked to him a few minutes before the boy whose right leg was paralyzed was brought to the operating table. When the patient appeared Jonnesco bowed to the medical men. He is a man of man who would attract attention wherever he appeared, a man you would turn and look at again if you passed him on the street. He looks like a well-dressed Russian, more like a soldier than a surgeon.

The little boy with the paralyzed leg was followed on the operating table by a boy 11 years old. The operation was to correct a club foot. Jonnesco injected into his spinal cord between the twelfth dorsal and the first lumbar vertebra a combination of five centigrammes of stovaine and one milligramme of strychnine, about double what he had given the younger child. Dr. Jonnesco explained that the older the patient the stronger the injection must be, generally speaking.

ESTRADA REPORTS A VICTORY

50 DOES ZELAYA—MANY MEN KILLED, BOTH AGREE.

Dictator Got Tip From New Orleans to Fight New Forces of Outrage in Costa Rica—Mayer Would Try Zelaya for Murder—Trouble in Honduras New.

Special Cable Dispatch to THE SUN.

PORT LEMON, Costa Rica, Dec. 7.—A wireless message received here reports an engagement above Rama between the forces of Gen. Estrada and Zelaya's army under Vasquez, in which the latter was beaten, leaving over 100 dead and wounded on the battlefield. Estrada is said to have captured 100 prisoners and a lot of cannon and ammunition.

The launch Eagle, which left here on Sunday with thirty-five volunteers for the Estrada army arrived safe at Bluefields. It is said that a clearance having been refused the launch, she picked up her anchor and left port without it.

A passenger from Colorado, Eligio Sibaja, states that Zelaya's troops entered the Aragon farm, where the Costa Rican flag was flying, ill-treated the people and committed many outrages.

About 200 bodies floated down the river after the battle of San Juan Del Norte. It is officially announced that Chamorro lost in the battle at San Juan twenty-one men killed and thirty-one wounded. Toledo has had to withdraw his forces to a safe point some distance from the town, because of the heavy fire kept up by Chamorro's ships. Gen. Castillo Chamorro, who was killed in the recent battle, is a brother of the leading general, Emilio Chamorro, who is now blockading San Juan Del Norte. The blockading body was carried to Managua by order of Zelaya.

The Government party in Nicaragua from latest advice appears to be in a bad way, with Toledo bottled up at Greytown. Vasquez, beaten by Fornes Diaz above Rama and the water completely cut off, is being driven from making any further march. It is confidently expected that as soon as Gen. Chamorro receives the shipment of arms looked for daily the revolutionists will take but a short time to overcome the Government forces.

It is reported that Zelaya telegraphed the Mexican Minister in San Juan his desire to resign and take up his residence in Belgium. It is also stated that orders have been sent to Toledo and Vasquez by Zelaya to suspend operations until further advice.

NEW ORLEANS, Dec. 7.—The signal for the big, and presumably the decisive, battle of the Nicaraguan revolution near Rama was fired from New Orleans last night at 10 o'clock by Francis Alchul, the Consul-General in New Orleans for President Zelaya. Mr. Alchul cabled President Zelaya to have Gen. Nicolas Vasquez make an immediate attack upon the revolutionary army as the men were badly handicapped for arms.

Ever since the steamship Ustain sailed two weeks ago carrying thousands of rifles and cartridges to the revolutionists Mr. Alchul has quietly been making an investigation of the purchases and found that the rifles were of Mauser model while the cartridges were Remington make and would not correspond.

The steamship Ustain when she arrived at Bluefields was despatched at once in search of Mauser cartridges and is now making a desperate effort to secure the necessary ammunition along the coast of Central America, with little likelihood of securing it.

The handsome home on Canal street in this city which was purchased by President Zelaya some six months ago and which for many years has been one of the stately dwellings in New Orleans has been advertised for sale at what is believed to be below its market value in a desperate effort of the dictator to raise money.

Radical action to bring Zelaya to book for the killing of Groce and Cannon is proposed by Senator Rayner of Maryland. Senator Rayner is considered one of the best lawyers in the Senate and after a research of precedents in the State Department he has reached the conclusion that President Zelaya can be tried for murder.

Senator Rayner believes that Zelaya is an international brigand and should be treated as such. He will introduce a joint resolution authorizing the President of the United States to take all necessary steps for the apprehension of Zelaya and bringing him to trial. The Senator assumes that the men were enlisted in the insurgent army and were not guilty of treason. His resolution will be directed solely against Zelaya.

It will be the duty of the President to act with the forces of the United States alone or in conjunction with the insurgents. The resolution will treat the execution of the men as an international crime, constituting the offense of murder under the international code of military warfare which is now universally recognized.

So far the Department has not worked out all its plans for punishing Nicaragua for the execution of the two Americans because a decisive battle has not occurred. Gen. Estrada is successful in the conflict and defeats Zelaya's troops.

The provisional Government will recognize the provisional Government as soon as it is in complete and undisputed control of the machinery of government and is in a position to undertake international obligations.

When a provisional Government is established in Nicaragua which can be recognized by the United States and with which the United States can enter into diplomatic negotiations, some progress can be made toward locating and punishing the persons responsible for the alleged barbarous treatment of the two Americans before their execution. If Zelaya should defeat the insurgent forces all the plans of the State Department will be deranged and a new way of handling the situation will have to be evolved.

The first sign that the present disorder in Nicaragua is likely to spread to other Central American republics was received at the State Department today. A dispatch was received from the American Legation at Tegucigalpa, Honduras, saying that martial law was declared yesterday in anticipation of a revolutionary invasion. The dispatch gave no details.

Several days ago, however, information was received at the State Department that Manuel Bonilla, formerly President of Honduras, was planning a revolutionary movement against President Davila in order to reestablish himself. In 1907 Bonilla was deposed and driven out of Honduras by the joint forces of President Davila and President Zelaya. This was the revolution that led to the calling of the Central American Peace Conference which was held in Washington two years ago.

In view of the fact that Bonilla was aided in attaining the Presidency of Honduras through his friendship with

ON THE FIRE A YULE LOG, ON THE TABLE A BOX OF GOOD CIGARS—THAT'S CHRISTMAS.

No cigars ever introduced by us have hit the popular taste more completely than our Porto Rican brands—every one imported exclusively for sale in United Cigar Stores. A choice from this list is safe:

LA TUNITA, Princessa Size, box of 50, \$2.50

LA TUNITA, Panetela Size, box of 50, \$2.50

RICORO, Panetela Size, box of 50, \$3.00

RICORO, Invariable Size, box of 50, \$3.50

LA RESTINA, Perfecto Size, box of 25, \$2.50

We invite your inspection with no obligation to buy.

UNITED CIGAR STORES

Zelaya officers of the State Department regard it as reasonably certain that there will be a revolution against Davila if Zelaya is overthrown.

If the revolutionary movement in Honduras develops to large proportions the problem of pacification will be considerably more difficult than it is now. So far the revolution in Nicaragua has been confined entirely to that country.

The State Department has no information regarding the reported special mission to Washington which Enrique C. Creel, former Mexican Ambassador to the United States, is reported to have undertaken. According to press dispatches from Mexico City Creel would leave there shortly. His visit is undoubtedly in connection with the disturbances in Central America.

It was said at the State Department today that Mexico and the United States are cooperating in the present trouble in Central America. The details of the cooperation however were not made clear.

Senator Creel came to Washington last year on a similar special mission during the disorders along the Mexican border.

WASHINGTON, Dec. 7.—The Nicaraguan legation gave out a statement to-night to the effect that a dispatch had been received from President Zelaya claiming a victory for the Government troops over the forces of Estrada at the battle of Rama. The dispatch also said that Zelaya's forces suffered a loss of 200 men killed, while the revolutionary losses were larger.

SHELL AND SHRAPNEL. Germany Has Most Formidable Ammunition for Great Guns.

Special Cable Dispatch to THE SUN. BRUSSELS, Dec. 7.—A German ordinance engineer has solved a problem with which military experts have been wrestling for ten years and has succeeded in perfecting a unified projectile combining the functions of shrapnel and a common shell. The factories at Spandau have been working at high pressure lately to supply the whole German artillery with the new projectile, which will remove the necessity for carrying two kinds of ammunition.

It is said that the new shell exceeds in carrying power, velocity and destructiveness any artillery ammunition hitherto employed in Germany. The German field guns ought, it is thought, to be able now to overcome the superiority of the French artillery.

DELAY FOR COOK PAPERS.

Steamer United States Will Not Reach Copenhagen Until To-day.

Special Cable Dispatch to THE SUN. COPENHAGEN, Dec. 7.—The steamer United States, which is conveying the records of Dr. Cook, has been delayed in her arrival here and will not arrive until to-morrow morning.

Mr. Egan, the American Minister, wished to postpone his departure for the United States for the purpose of attending the development of the examination of the records, but he has just received a cable dispatch saying that his mother is ill, and he will leave for New York on Thursday.

All the newspapers and the people generally still believe in Dr. Cook.

MARCONI GOING FOR HIS PRIZE.

He's to Receive the Nobel Award for Physics at Stockholm on Saturday.

Special Cable Dispatch to THE SUN. COPENHAGEN, Dec. 7.—William Marconi has arrived here en route for Stockholm, where he is to receive the Nobel prize for physics on December 11.

He is accompanied by his wife.

Easier to Become an Equal Franchiser.

The directors of the Equal Franchiser Society have decided at the request of Mrs. Mackay, the president, that persons may be admitted to membership on the endorsement of any member. Heretofore candidates' names have been passed upon by a committee. The society is to invite Senators and Assemblymen from this city to attend the remaining meetings at the Garden Theatre.

DEAD BUILDING CODE DUG UP

REPORT THAT THE HOSTILE FIREPROOFERS HAVE AGREED.

If Tammany Couldn't Get Some Kind of a Code Through Before Jan. 1 It Might Not Get Anything Like What It Wanted—Money for Sea View Hospital.

Alderman Dowling, the Tammany leader of the board, caused general surprise at the Aldermen's meeting yesterday by moving that the building code adopted some months ago by the Aldermen be introduced as new matter and that it be referred to the Committee on Buildings. He gave no explanation. The Aldermen allowed the code to be sent to the buildings committee without opposition.

The code thus resurrected is the one which gave advantage in the fireproofing requirements of the city to the hollow tile interests over the Roebbing concrete system. Charles F. Murphy is understood to be interested in the hollow tile industry and Richard Croker in the Roebbing company. Tammany succeeded in passing the code, although its opponents contended that it would give a monopoly of fireproofing to the hollow tile people. After public hearings the Mayor vetoed the code, saying that before he would accept it he would have tests made of the merits of the two materials.

Alderman Doull led the fight on behalf of the concrete fireproofing, and a renomination was refused to him. Neither he nor Mr. Dowling would discuss yesterday the reintroduction of the code. The belief generally held after the meeting yesterday, and strengthened by the fact that Doull made no objection to Dowling's motion, is that the hollow tile and concrete interests have reached an understanding that will interest builders and ultimate consumers.

One reason why the friends of the hollow tile are anxious to have a new building code adopted before the end of the year is that there is some doubt as to whether the Democrats will control the new board. This board will be made up of forty Democrats and thirty-nine Republicans, but Borough President Grosvenor of Queens and his far Democratic Aldermen have so far refused to commit themselves to any assurance that they will ally themselves with Tammany. In fact Mr. Grosvenor makes no secret of the fact that he expects to hold the balance of power in the new board and that it is his intention to make the most of that power.

The Aldermen sanctioned yesterday the appropriation of \$1,350,000 to complete the Hospital for Consumptives, at Sea View, Staten Island. Charles Commissioner Hebbard told the board that the sanitarium would accommodate 1,000 patients and that as it would be more than a mile away from any railroads there was no objection to it on the part of residents of Staten Island.

John Purroy Mitchell, president-elect of the board, attended yesterday's meeting on the invitation of President McGowan. While Mr. Mitchell was present Mr. McGowan was more than usually strict with the members and enforced all the rules.

PROSECUTE DANISH LEADERS.

Folkething Adopts Report Against Ex-Ministers Christensen and Berg.

Special Cable Dispatch to THE SUN. COPENHAGEN, Dec. 7.—The Folkething, acting on the report of the committee which has been investigating the charges against former Prime Minister Christensen and former Minister of the Interior Berg in connection with the frauds perpetrated by P. A. Alberti, who was Minister of Justice in the Christensen Cabinet, adopted unanimously to-day a resolution that both Christensen and Berg should be prosecuted.

The minority of the investigating committee was opposed to the prosecution, but voted for the resolution.
